ORGANIZE

ONE DAY - WORKSHOP

on

"IPR: Patent Drafting, Copyright & Trademark, Basics and Filing Procedures"

Event Title	IPR: Patent Drafting, Copyright & Trademark, Basics and Filing Procedures		
Resource Person	**Mr. KIRUBAKARAN J** Patent Agent & Trademark Associate IP **iTNT Hub. Anna** University	**Dr. K. Boopathy** Professor, EEE AVIT, Chennai	
Academic year	2026 - 2027		
Program Type (Workshop / Motivation speech / Field Visit / Competition / Others)	Workshop		
Program Theme (IPR / R&D and Innovation / Start-up / Entrepreneurship / Design Thinking / Incubation & Pre – Incubation / others)	IPR		
Start date & End Date (DD/MM/YYYY)	30-09-2026	30-09-2026	
Duration of the activity (in Mins) & Start Time & End Time	Duration: Mins.	Start Time: 09:00 AM	End Time: 03.00 PM
Participants	Students:89	Faculty: 10	External:-
Mode of session (online / offline)	Offline		
Event Organizer / Coordinator Faculty Name / Department / Designation	Dr. R. Viswanathan, Associate Prof./ CSE		
Target Participants	III & IV Year students of BME, ECE, CSE & EEE		
Outcome	The participants gained a fundamental understanding of Intellectual Property Rights (IPR) and its importance in academic research, innovation, and entrepreneurship. The program encouraged students to develop an innovation and entrepreneurship mindset and motivated them to identify and protect their innovative ideas through appropriate IPR mechanisms.

EVENT REPORT

IPR: Patent Drafting, Copyright & Trademark, Basics and Filing Procedures

The Intellectual Property Rights & Technology Transfer (IPR&TT), Aarupadai Veedu Institute of Technology, Chennai, organized a one-day workshop titled "IPR: Patent Drafting, Copyright & Trademark, Basics and Filing Procedures" on 30 September 2026 as part of the academic year 2026–2027. The program was organized with the objective of creating awareness among students and faculty members about Intellectual Property Rights (IPR), the importance of protecting innovative ideas, and the basic procedures involved in patents, copyrights and trademarks. The workshop was conducted in offline mode from 9:00 AM to 3:00 PM and was attended by 85 students and 10 faculty members. Students from the III and IV Year of BME, ECE, CSE and EEE participated in the program with great enthusiasm and interest.

The program commenced with the Master of Ceremony session conducted by Ms. Ch. Rishwika Reddy and Ms. I. Sai Manogna, III Year CSE–AIML students. The student coordinators formally welcomed the gathering and introduced the sequence of events. Their effective coordination helped in maintaining the smooth flow of the program throughout the inaugural session. The Welcome Address was delivered by Dr. K. Boopathy, Professor, Department of EEE, AVIT, Chennai. In his welcome address, Dr. Boopathy welcomed the resource person, dignitaries, faculty members and students and emphasized the growing importance of Intellectual Property Rights in the fields of research, innovation, technology development and entrepreneurship. He highlighted the need for students to understand the value of protecting their innovative ideas and academic project outcomes at an early stage.

Following the welcome address, Dr. R. Viswanathan, Associate Professor, Department of Computer Science and Engineering, AVIT, Chennai, delivered the introductory remarks and introduced the chief resource person, Mr. Kirubakaran J, Patent Agent & Trademark and Associate IP, iTNT Hub, Anna University. Dr. Viswanathan highlighted the relevance of IPR awareness for engineering students and researchers and explained that many innovative ideas developed as part of academic projects can potentially lead to patents, copyrights, trademarks or other forms of intellectual property. He emphasized that innovation does not end with developing a new idea or technology; appropriate measures must also be taken to identify, document and protect such innovations. He also motivated the participants to develop an innovation-oriented mindset and to explore the possibilities of protecting their research outcomes and project ideas through suitable IPR mechanisms.

The felicitation of the resource person was carried out by Dr. L. Prabhu, Vice Principal, AVIT, Vinayaka Missions Research Foundation, Deemed to be University, Chennai. Dr. Prabhu felicitated Mr. Kirubakaran J and appreciated his presence and contribution towards

creating IPR awareness among the students and faculty members. The inaugural session created a positive and enthusiastic atmosphere among the participants and set the stage for the technical sessions of the workshop.

The morning technical session was delivered by Mr. Kirubakaran J, Patent Agent & Trademark, Associate IP, iTNT Hub, Anna University. His session focused extensively on the fundamentals of Intellectual Property Rights and the practical aspects associated with patent drafting, copyright and trademark protection and filing procedures. He explained the concept of intellectual property and discussed why intellectual creations and innovations need to be appropriately protected. He provided participants with an overview of different forms of intellectual property and explained the relevance of IPR in the current research and innovation ecosystem.

Mr. Kirubakaran J particularly discussed the fundamentals of patents and patentability and explained the basic considerations that need to be examined before proceeding with a patent application. He provided an overview of the patent drafting process and explained the importance of clearly describing an invention and presenting its innovative aspects appropriately. The participants were introduced to the general procedure involved in patent filing and were made aware of the importance of proper documentation and systematic presentation of an invention. The session also helped students understand that an innovative idea needs to satisfy appropriate requirements before it can be considered for patent protection.

The resource person also elaborated on Copyright and Trademark and their significance in protecting different forms of intellectual creations and business identities. The participants gained an understanding of the distinction between patent, copyright and trademark protection and the different purposes served by each form of IPR. The discussion on copyright was particularly relevant to students working on software, academic content, creative works and digital resources, while the discussion on trademarks helped participants understand the importance of protecting names, symbols, logos and other identifiers associated with products and services.

The session was interactive and provided opportunities for students to clarify their doubts and understand the practical relevance of IPR in their academic and professional activities. The participants were encouraged to think beyond the completion of academic projects and consider whether their project outcomes, software applications, technical solutions, designs or research findings could have potential intellectual property value. The session therefore served as an important platform for developing awareness about innovation, research commercialization and intellectual property protection.

Following the morning session, Dr. K. Boopathy, Professor, Department of EEE, AVIT, Chennai, conducted a one-hour technical session on the same theme of Intellectual Property Rights. During this session, Dr. Boopathy further discussed the importance of patents,

copyrights and trademarks and reinforced the concepts covered during the earlier session. He explained the relevance of IPR protection in academic research and student innovation and encouraged the participants to identify innovative components in their academic projects and research activities. The session helped students consolidate their understanding of IPR and relate the concepts to their own academic and technological work. Dr. Boopathy also highlighted the importance of developing awareness about intellectual property at the early stages of innovation so that valuable ideas are not left unprotected.

The afternoon session was followed by an interactive IPR Quiz Program conducted by Dr. K. Boopathy from 2:00 PM to 3:00 PM. The quiz was organized to assess and reinforce the knowledge acquired by the participants during the workshop. Questions covered the major concepts discussed during the sessions, including patents, patentability, patent drafting, copyright, trademarks and general IPR-related procedures. The quiz created an engaging learning environment and encouraged active participation among the students. It also provided an opportunity for the participants to evaluate their understanding of the subject in an informal and interactive manner. The students participated enthusiastically and demonstrated considerable interest in the questions related to intellectual property and innovation.

The workshop successfully achieved its objective of creating awareness about Intellectual Property Rights among students and faculty members. The participants gained a basic understanding of the importance of IPR in protecting innovative ideas, research outcomes, software, designs, creative works and technological developments. The technical sessions provided valuable insights into patent drafting and filing procedures and helped participants understand the basic differences between patents, copyrights and trademarks. The interactive discussions and quiz further strengthened the participants' understanding of the concepts and encouraged them to explore IPR opportunities associated with their academic projects and research work.

The program also motivated students to develop an innovation and entrepreneurship-oriented approach towards their academic activities. Participants were made aware that innovative ideas can have significant academic, technological and commercial value when properly documented and protected. The workshop therefore contributed towards creating an institutional culture that encourages innovation, research and intellectual property generation. It also provided students with practical awareness that can help them in future research projects, start-up initiatives, product development and technology-based entrepreneurship.

The successful conduct of the workshop was supported by the active participation of the faculty members and students. The participation of 85 students and 10 faculty members from BME, ECE, CSE and EEE departments demonstrated the interest of the academic community in understanding Intellectual Property Rights. The presence and guidance of the

resource person, institutional leadership and faculty coordinators contributed significantly to the successful completion of the program.

At the conclusion of the program, C. Mallieswari, Student, IPR Member, delivered the Vote of Thanks. She expressed sincere gratitude to the management and institutional leadership, Dr. L. Prabhu, Vice Principal, the resource persons Mr. Kirubakaran J and Dr. K. Boopathy, the faculty members, student coordinators and all the participants for their valuable support and active involvement in making the workshop successful. She also acknowledged the efforts of the organizing team and student coordinators in facilitating the smooth execution of the event.

Overall, the workshop on "IPR: Patent Drafting, Copyright & Trademark, Basics and Filing Procedures" was a highly informative and interactive academic activity that successfully enhanced awareness of Intellectual Property Rights among students and faculty members. The expert session by Mr. Kirubakaran J provided practical insights into patent drafting, copyright, trademark and filing procedures, while the session by Dr. K. Boopathy reinforced the concepts and provided an interactive learning experience through the subsequent quiz program. The workshop encouraged the participants to recognize, document and protect innovative ideas and research outcomes and motivated them to pursue further activities in the areas of research, innovation, intellectual property and entrepreneurship. The program concluded successfully with active participation and positive engagement from all the participants.
